WHY USE A PD285 PADDLE MIXER?

The PennDrill PD285H paddle mixer was specifically designed for the water well and geothermal contractor in mind.

The PD285H will mix sand based grouts as well as Bentonite/Polymer mixes with mixing times of less than 4 minutes. The mixer is equipped with a variable speed piston pump that will produce up to 20 gpm and up to 500 psi.

Heavy gauge steel is used in the fabrication of the tank and frame to ensure durability. Quality hydraulic components are used to ensure reliability. We offer a variety of tank sizes and pump ranges to suit your specific needs.

SPECIFICATIONS:

- 65 gallon mixing tank with variable speed control
- 35 gallon hydraulic oil tank with sight gauge
- Safety shut-off switch
- 20 gpm @ 500 psi variable speed piston pump
- 18 hp gas engine with electric start
